Project team

Kathleen Baxter – Public Information Officer, COE

Kelly Frazee – Public Information Specialist, COE

Souheil Nasr – Utilities Engineering Manager, COE

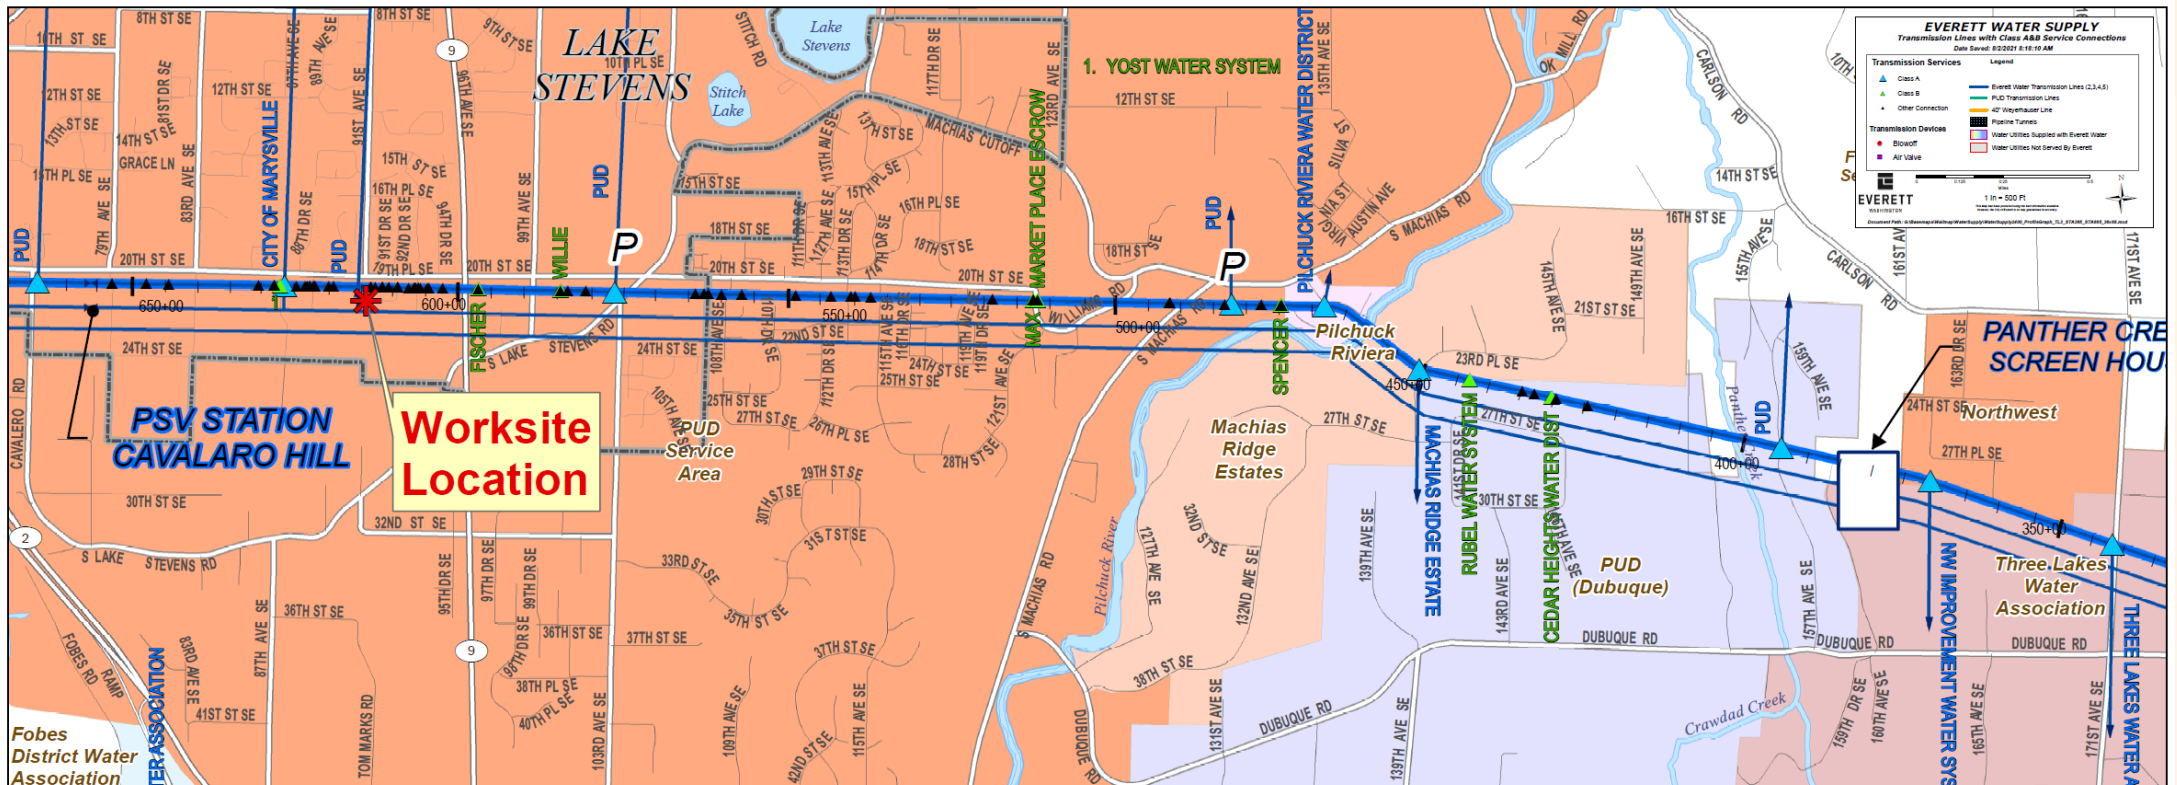

Jeff Marrs – Operations Superintendent, COE

Derek Pell – NW Regional Manager, DOH

Jolyn Leslie – Regional Engineer, DOH

Project overview

Project overview

Location: 91st Ave SE/20th St SE

Impacted services: Between 79th Ave SE and 157th Ave SE (70 Services)

Purpose: vertical re-alignment of 1936, 48-in water transmission line

Need: Due to extension of 91st Ave SE

Customer impacts

Service interruptions are part of being connected to a water transmission line.

- Prepare to be out of water for up to 72 hours
- Know how to keep your water service safe
- Know the steps to take when returning to service

How to prepare

Average water use:

80 to 100 gallons per person, per day

- Personal hygiene: at least 1 gallon/person/day
- Toilet flushing: 5 flushes/person/day;
1 -2 gallons/flush
- Keep in mind what you will need for cooking, dishes, and animals

Non-drinkable water truck

Cavalero Hill Dog Park near 79th Ave SE

Tuesday, Wednesday and Thursday

8:00 a.m. - 4:00 p.m.

Non-potable/non-drinkable water (for
flushing toilets)

Bring your own water containers

Protect your water service

- Close toilet valves; only flush when necessary
- Shut off water heater valve
- Cover or mark faucets
- Don't use clothes washers, dishwashers, other water appliances or outside hose bibs

Returning to service

- Sign up to receive project updates or check website everettwa.gov/TLM
- Run each inside cold-water faucet for several minutes, until all air is out of the line and water is clear. *This may take up to 30 minutes.*
- Turn toilet valves and hot water valve back on.

If you have questions or concerns about your water, call Dispatch at (425) 257-8821 (24/7).

Avoid future interruptions:

Water transmission lines bring water from Everett's water filtration plant to its in-town distribution system.

TL-3 provides:

- 20 million gallons per day
- 20 – 80 psi pressure
- >150,000 customers served

Service interruptions

Getting household water directly from a transmission line involves periodic service interruptions.

Avoid future interruptions

- Connect to nearby Group A water distribution system
- PUD waiving \$7,855 in fees
 - Customer responsibility: ~\$1,500 + cost to relocate service line from meter to residence
 - Contact PUD at (425) 397-3000

Benefits of joining Group A Water System

- Source reliability
- Higher pressure
- Fire protection with fire hydrants
- Simplified operation of the transmission lines

Planned shutdown schedule*

*All times are approximate and dependent upon conditions

Mon., Sept. 27, 10 pm: Start draining the line

Tues., Sept. 28, 5-6 am: Contractor begins work to relocate and replace transmission line

Wed., Sept. 29, full day: Contractor relocates and replaces transmission line

Thurs., Sept. 30, 5 am: City crews start refilling the pipe

Thurs., Sept. 30, 10 pm: Service restored
